CSC1032 Coursework: Marking Process

Report should have the following structure. 10 pages MAXIMUM not including images or tables.

- S1: Idea and dataset description (15 marks)
- S2: Data Analysis and/or Preparation (30 marks)
- S3: Experimental Setup or algorithm (15 marks)
- S4: Results and Your Analysis (insights!) about what you found (40 marks)

Tip: The perfect report has a strong Results/Analysis section clearly showing that the student understands the data, the algorithm and can interpret the results.

What do you have to do?

Submit a PDF and dataset on Loop on or before 3rd November at midnight.

(If the dataset is too big for Loop, a link will suffice)
